

**SPECIALTY PRODUCTS: PROTHROMBIN CONCENTRATE COMPLEXES
FOR TREATMENT OF: FACTOR VIII or IX INHIBITORS; ACQUIRED HEMOPHILIA; ALTERED
HEMOSTASIS DUE TO LIVER OR MULTIPLE ORGAN DYSFUNCTIONS**

	PROFILNINE	BEBULIN-VH
MANUFACTURER	GRIFOLS	BAXTER
CATEGORY	PCC (prothrombin concentrate complex)	PCC (prothrombin concentrate complex)
CONTENTS	FACTOR IX COMPLEX, Vit K dependent factors	FACTOR IX COMPLEX, Vit K dependent factors
<i>Units FII per 100 units FIX</i>	148	120
<i>Units FVII per 100 units FIX</i>	11	13
<i>Units FIX per 100 units FIX</i>	100	100
<i>Units FX per 100 units FIX</i>	64	139
SOURCE MATERIAL	Pooled human plasma	Pooled human plasma
DOSING	FIX: 75 units/kg, repeated every 12 hours if necessary	FIX: 25-50 units/kg, repeat every 24 hours
VIRAL ATTENUATION PROCESSES	solvent and detergent	vapor heated
BOX CONTENTS	Diluent: 10 ml (all sizes) Sterile Water; transfer needle; filter needle	Diluent: 20 ml (all sizes) Sterile Water; transfer needle; filter needle
STORAGE REQUIREMENTS	Refrigerate or store at room temperature for up to 3 months	Refrigerate
COMMENTS	Monitor for thromboembolic complications during post op period.	Primary use for FIX deficient patients only. Of no use for FVII deficient patients.
		Monitor for thromboembolic complications during post op period.
